## Transcript

### Red Maple Homestead - Vendor

My name is Jeanette Lourens, and together with my husband, we own Red Maple Homestead. We tend the flock of sheep that provides milk and wool. The milk is used to make hard aged cheese, and the wool is processed into yarn and handwoven products. We also offer fibre mill services to other fibre enthusiasts. Wool is naturally anti-static, and a popular product is wool dryer balls. These replace your dryer sheets to dry your laundry faster and remove the static. I do a lot of custom commissions to match customer colour schemes and size requirements. Feel free to contact me with any questions.
